## Two New Contracts Awarded to Techenomics

Techenomics International is pleased to announce they have recently been awarded two new contracts. One contract was won by PT Tekenomics Indonesia and the other was awarded to Techenomics Australia.

PT.Tekenomics Indonesia successfully won the tender for the KPC Sangatta Oil Analysis contract and will start services immediately.

The three year contract covers the supply of oil analysis, grease, coolant and fuel testing for the large coal mine operated by Kaltim Prima Coal in east Kalimantan, Sangatta Indonesia. At this site the company operates a large mobile fleet exceeding 100 dump trucks and associated support equipment, power station, coal process plant and ship loading facilities.

PT.Tekenomics Indonesia will relocate an existing Sangatta laboratory to the Sangatta mine site and are expected to achieve ISO17025 accreditation by the end of the 2010 calendar year. All test work reporting will be provided to KPC via the company's revolutionary Blue Oceans software, the ultimate in condition monitoring software.

The winning of this contract will help improve the credibility, reliability and quality of service in that region for PT.Tekenomics Indonesia, further emphasizing their vision to be the best Oil Analysis provider in East Kalimantan and the dominant Oil Analysis service provider in Indonesia and ASEAN.

"We are committed to continuously improving our services and range of test work, together with total concern with quality and the development of new customised services to meet customer requirements." Says Chris Adsett, CEO, PT Tekenomics Indonesia.

"PT.Tekenomics Indonesia would like to thank KPC for this opportunity to support their Sangatta operations and look forward to a long and successful business relationship" continues Mr. Adsett.

Techenomics Australia was also awarded the BOOM Logistics Tender for the provision of Lubricant Analysis. BOOM logistics maintain a national presence and is Australia's leading supplier of integrated lifting solutions operating in excess of 619 cranes with up to 500 tonne capacity across Australia.

The Tender is a two year National Wide contract that will cover 62 depots; consisting of more than 619 cranes and another two and a half thousand pieces of equipment.

Techenomics Australia would like to thank BOOM Logistics for having this opportunity to provide an efficient Oil Analysis Program.
