

TECHENOMICS

To Whom It May Concern,

I had excellent fuel economy results from using the WS2. Consumption rate 7.85 litres per 100km. That's about a 13% improvement (+/-3%) on what I would normally get for the kind of driving I did on that tank. The best consumption rate I've ever had prior to this was 8.5 litres/100km and that was all moderate highway driving without much hills.

Sincerely,

Richard Palmer
